TRUCK RUN 川克

Truckrun eBike Systems

1. Performance

- 1.1speed display: average speed (AVG km/h), maximum speed (MAXS km/h)
- 1. 2Mileage display: TRIP、 0D0。
- 1.3gear control: change from $0^{\sim}5$.
- 1.4 back light adjust.

1.5kilometer/mile choose: according to customers need.

1. 6parameter setting: You can change a many parameter setting including gear wheel diameter, speed limit through communication lines in the computer.

1.7Charging Status: providing stable charging status through optimization algorithm, resolved the

problem that the power fluctuate with the start and stop of motor.

1.8light perception headlight: through the change of light to open or close backlight of meter and headlight.

1.9 five-way button make customer convenient and fast.

- 1.10assistant
- 1. 11 Diagnostic Warning.
- 2. External dimension

The material is PC of product, liquid crystal display(LCD) is acrylic with high hardness.

3. Skills specification

2 No.9 Xinqin Road, Hongshan street , Xinwu district , Wuxi.

TRUCK (RUN) 川克

Truckrun eBike Systems

voltage	36V
Status current	10mA
Maximum current	30mA
electric leakage	<1 µ m
trial temperature	−18 [~] 60°C
Storage temperature	−30 [~] 60°C
IP	IP65
Storage humidity	30%-70%
Test identification	CE/ROSH/EN15194/REACH

4. Display interface

4.1 USB: Using USB to charge your phone .

4.2 speed: display number, km/h or mile/h.

4. 3assistant: Display in assistant model.

4.4 headlight: Display when headlight s and backlights are on.

4.5power display : Current battery is display.

4. 6fault indication: When have malfunctions the mark isplay.
3 No. 9 Xingin Road, Hongshan street , Xinwu district , Wuxi.

TRUCK RUN 川克

Truckrun eBike Systems

4.7speed unit: You can convert kilogram and mile.

4.8 gear display: Current booster position from 0 to 5, when display number 0 is neutral gear, the assistant gear is from 1 to 5.

4.9 Mileage display: TRIP, ODO.

4.10Mileage display: According to the model is designed. Which display the massage of mileage.

5. Operation instruction

5.1. power switch: press button for 2 seconds to open meter, press 3 seconds to down meter. If you do not operation meter in 5 minutes it can be closed.

5.2. assistment gear choice: button "+" or "--", can change power-assistant gear, and change motor power, lowest is 1, maximum is 5, the default number is 1when the meter is turned on, and it is neutral when the number 0 is displayed.

5.3. change model: button can change the massage of milage, speeed and time., cycle display mileage (TRIP/0D0) \rightarrow speed (MAXS/ AVG km/h) \rightarrow time (Time--min)

5.6 power display: When the battery is fully charged, the 10-segment LCD of the battery is displayed according to the actual power and the outer frame is lit. When the battery is exhausted, the battery's 10-segment LCD is completely off and the outer frame is flashing, requiring immediate charging. The battery level (C) shows the correspondence table
